Cognizin® Citicoline: The Nootropic at the Top of the Leaderboard

- Clinically Studied
- Non-Stimulant
- Flexible Delivery Formats

A Cognitive Health Ingredient for Gamers

Citicoline is a mononucleotide that our body naturally produces and has an important role in cell function. Cognizin® Citicoline is a pure, branded form which:

- Aids in the synthesis and maintenance of healthy cell membranes.*
- Supports the healthy mitochondria activity leading to increases in brain energy.*
- Provides vital nutrients that protect neurons from free radical damage.*

Our Clinical Study with Adolescent Males Showing Cognizin®’s Effect on Motor Speed and Attention

Gamers and fans alike are looking to gain an edge when playing their favorite game. In our study, researchers observed an increase in both attention and psychomotor speed in adolescent males after 28 days of Cognizin® supplementation².

A Growing, Newly-Mainstream Market¹
